MBR ANNOUNCES 2010 CAMARO ARRIVE-AND-DRIVE KONI CHALLENGE PROGRAM

Michael Baughman Racing is pleased to announce the addition of the Grand Am Koni Challenge Camaro Arrive-And-Drive program to our racing services line up. The program will feature the 2010 Camaro built by Riley Technologies and serviced at the track by TeamMBR.

“We believe the new Koni Challenge Camaro will be a podium contender from the start”, said Mike Baughman, President of Michael Baughman Racing. “Coupled with our experienced crew and racing tradition, we expect this team to be highly competitive and will garner lots of attention”.

“Riley Technologies is excited about the new Koni Challenge Camaro and is looking forward to building cars for Team MBR and also for their 'Arrive and Drive' program. We certainly look forward to see the new Camaro race heads up with its' American and European counterparts,” said Bill Riley, President of Riley Technologies. “Based on years of winning results including an all-Riley podium at this year’s 24 Hours at Daytona, Riley race cars are clearly one of the most competitive platforms in racing today. With this combination, we are well positioned for yet another winner.”

The 2010 Koni Challenge Chevrolet Camaro, built by Riley Technologies, will be available for Arrive and Drive participants by mid season. Program details are available by contacting TeamMBR at ArriveandDrive@TeamMBR.Com or by calling Mike Baughman at 301-842-1159.

ABOUT MICHAEL BAUGHMAN RACING:

MBR is a team of individuals who are passionate about the business of racing. The members of MBR race team are all educated, ambitious and successful businessmen who share a common passion for competing - and winning - in the most professional and competitive form of sports car racing in North America. This mutual drive is fueled by a shared goal to be the most respected and auspicious team in domestic sports car racing. The members of MBR have more than 30 years of combined experience in professional, semi-professional, and club-level (amateur) racing. MBR'S members boast highly decorated racing resumes and benefit from leadership that has competed in Grand Am since its inception. For more information, visit <http://www.TeamMBR.Com>.

ABOUT TEAMMBR ARRIVE-AND-DRIVE PROGRAM:

The TeamMBR Arrive-and-Drive Program provides opportunities for funded or sponsored drivers to join TeamMBR for the racing season or selected events in the Grand Am Rolex Series DP/GT class, or Koni Series GS class. TeamMBR provides a competitive race car, driver coach, team, spares, transportation, and your sponsor signage on the race car. Program options include race car support, additional test time and sponsor marketing support. Program participants benefit from TeamMBR's experience with the program since 2002. For more information contact Mike Baughman at 301-842-1159 or by email at ArriveAndDrive@TeamMBR.Com.

ABOUT RILEY TECHNOLOGIES:

Riley Technologies draws upon years of experience designing, developing, and manufacturing high performance race cars. Riley can deliver anything from individual components to complete race cars in their new 40,000 square foot manufacturing facility located in Mooresville, North Carolina. Riley Technologies has an extended legacy of success developing competitive on-track products for the Rolex Sports Car Series, the American LeMans Series, the USAC Silver Crown Series, and the Japanese GT Championship Series.
